

The Gabriel Alcalá Foundation works to improve the lives of children with cerebral palsy, by offering support and resources to kids with the condition. Cerebral palsy is an incurable condition that requires a lifelong commitment to treatments, physicians, therapists, medications, and durable medical equipment in order to live a comfortable life. The journey can be overwhelming and expensive. The goal of our organization is to promote awareness of pediatric cerebral palsy and offer support and resources to parents and caregivers of children with cerebral palsy.
